Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim 1 has been considered.

Claim Rejections - 35 USC § 102

5 The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

10 (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

15

Claim 1 has been rejected under 35 U.S.C. 102(e) as being anticipated by Enichen, U.S. Patent No. 6,333,983.

20 As per claim 1, the applicant describes a device comprising the following limitations which are met by Enichen:

a) a memory for storing a cryptographic key (Col 3, lines 43-61; Fig 2);

b) a first cipher processor for receiving unencrypted data and for generating encrypted data using said cryptographic key and providing said encrypted data to a second cipher processor (Col 3, lines 43-61; Fig 2);

25

c) said second cipher processor for decrypting said encrypted data using said cryptographic key to generate said unencrypted data and providing said unencrypted data to a third cipher processor (Col 3, lines 43-61; Fig 2);

d) said third cipher processor for encrypting said unencrypted data using said cryptographic key to generate said encrypted data (Col 3, lines 43-61; Fig 2);

30

The applicant's idea is to use one key in a Triple DES type system, such as the one in Fig 2 of the primary reference, for a single encryption output as opposed to a triple encryption

output. Enichen discloses that K3 and K2 can be equal to K1 in the system to create a single encryption output (Col 3, lines 56-61).
